

# In-House Lawyer Day 2018

Managing risk, protecting reputation

Seminar 1

# Data breaches

Ashley Hurst, Charlie Wedin

## GDPR | Data breach notification

Is it really a "data breach"? Avoid that term if possible

Who is the data controller(s)? A question of fact not contract

**Article 33 (Regulators):** assess the risk to data subjects – consider preliminary notification

**Article 34 (Data subjects):** if "high risk" but what is the right thing to do?

Call / Standard form / letter Whichever the most appropriate

Insurance

## Oh See data incident

Oh See has purchased a licence to a piece of software called iKonecT – a smart procurement system to automate customer orders through its supply chain.

On Friday, 16 November at 4pm Oh See becomes aware of a **potential** intrusion into its systems following a data transfer alert from its cyber security software.

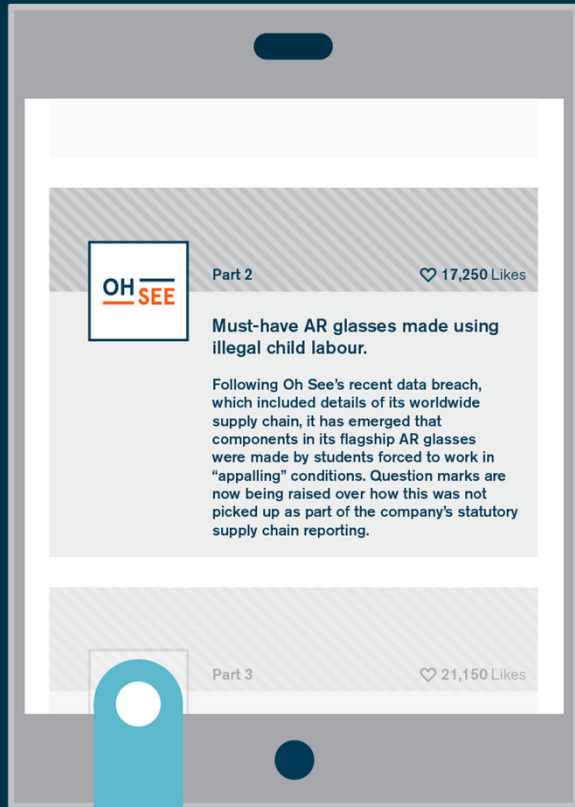

Initial forensic investigations indicate that the customer database on iKonecT (which is hosted on Amazon Web Services) **may** have been accessed from Oh See's IT system via compromised login credentials of a member of the Oh See IT team.

The iKonecT database contains 100,000 customer records, including names, email addresses, home addresses, hashed passwords and purchasing histories.

Indications are that there was an attempt to exfiltrate a large volume of data but it was unsuccessful.

It's Monday morning and Oh See wants to know whether it should notify the ICO and the 100,000 customers potentially affected.

## Seminar 2

# Business transparency: where risk meets reputation

Dipika Keen, Chris Wrigley,  
Leanne Coates, Carrie Brassley,  
Dr Zara Nanu

# What is business transparency?

"The mandatory disclosure of previously private business information or data so that it is publicly available."

**Targeted action in specific areas**

**Alternative to quotas / sanctions**

**Change corporate behaviour by leveraging business stakeholders / risk of reputational damage**

**Published data can be used as a differentiator (e.g. public procurement)**

# Targeted areas

## Ownership

UK corporates

Foreign entities

- holding UK real estate
- bidding for UK public contracts

## Supply chains

Modern slavery statements

Payments to suppliers

Conflict minerals

## Workplace

Gender pay gap

Ethnicity pay

Pay ratios

## Environment

Greenhouse gas emissions

Energy usage

## What should businesses be doing?

- ✓ **Understand what is on the horizon**  
Long lead times mean you can be prepared
- ✓ **Manage risks triggered by disclosure**  
Reputational, compliance, financial
- ✓ **Exploit opportunities**  
Using data to drive business improvement  
Using disclosures to enhance brand
- ✓ **Take a holistic approach**  
Connect your functions: global compliance programme

# Supply chains

**Understand  
the  
benefits**

**Practical  
steps**

**Data  
collection /  
trends**

## Gender pay gap 1 year on

- What have we learned?

## Ethnicity pay gap

- What do we know?

## Data-led solutions

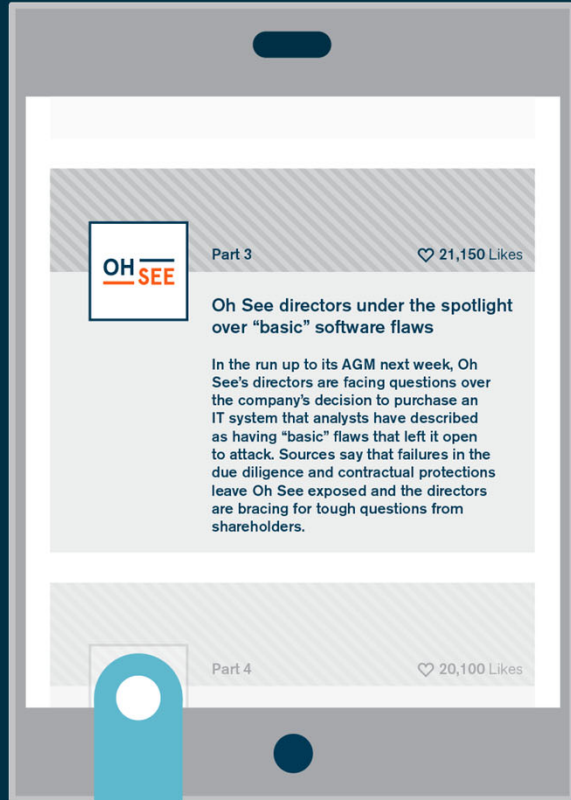

- What tools are available?

## Seminar 3

# Digital transformation and risk:

Catherine Hammon, Tom Harvey, Katie Vickery, Mark Taylor, Jon Round

# Corporate governance expectations

## Tom Harvey

## Impact of a cyber breach

**£3m**

Average global cost of  
cyber breach  
(IBM, 2018)

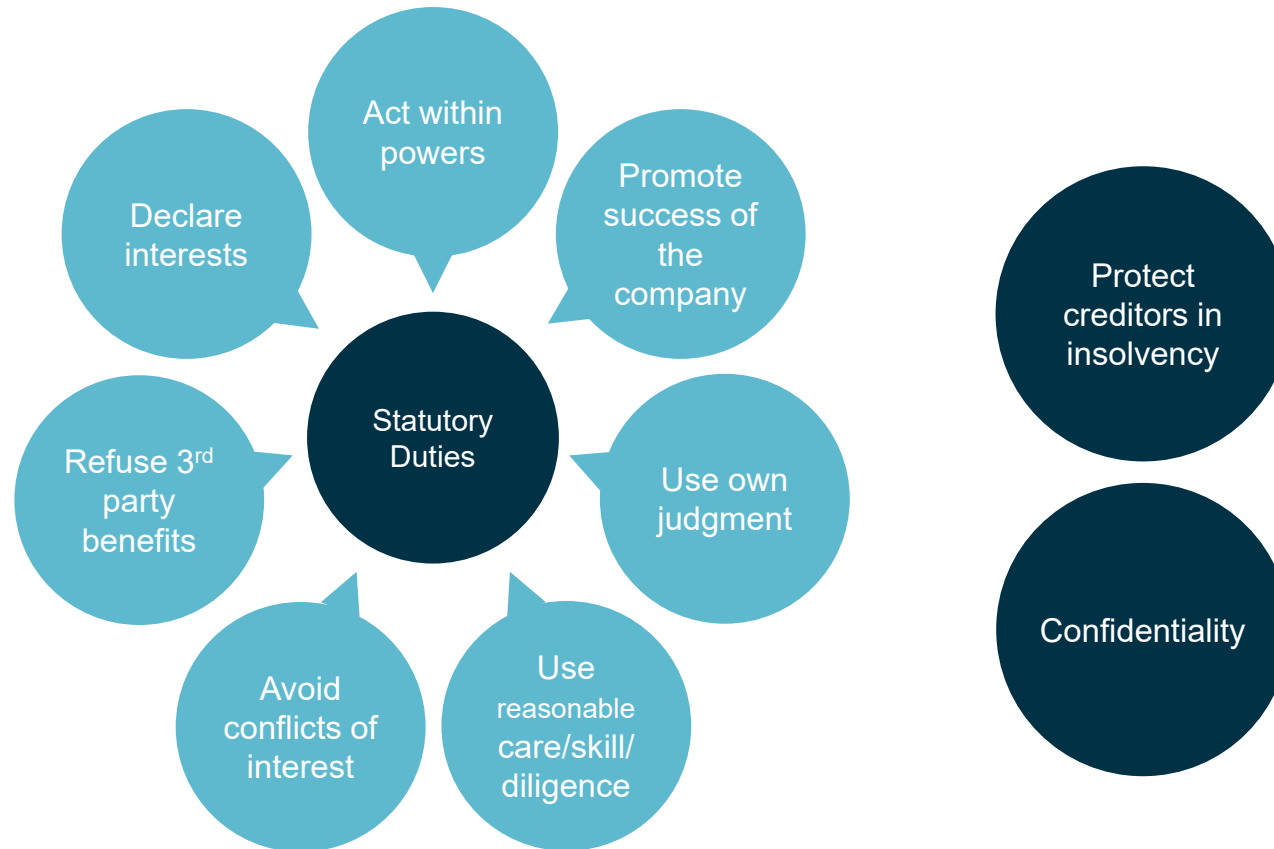

**1.8%**

Permanent drop in  
share price following a  
major cyber incident  
(Oxford Economics,  
2018)

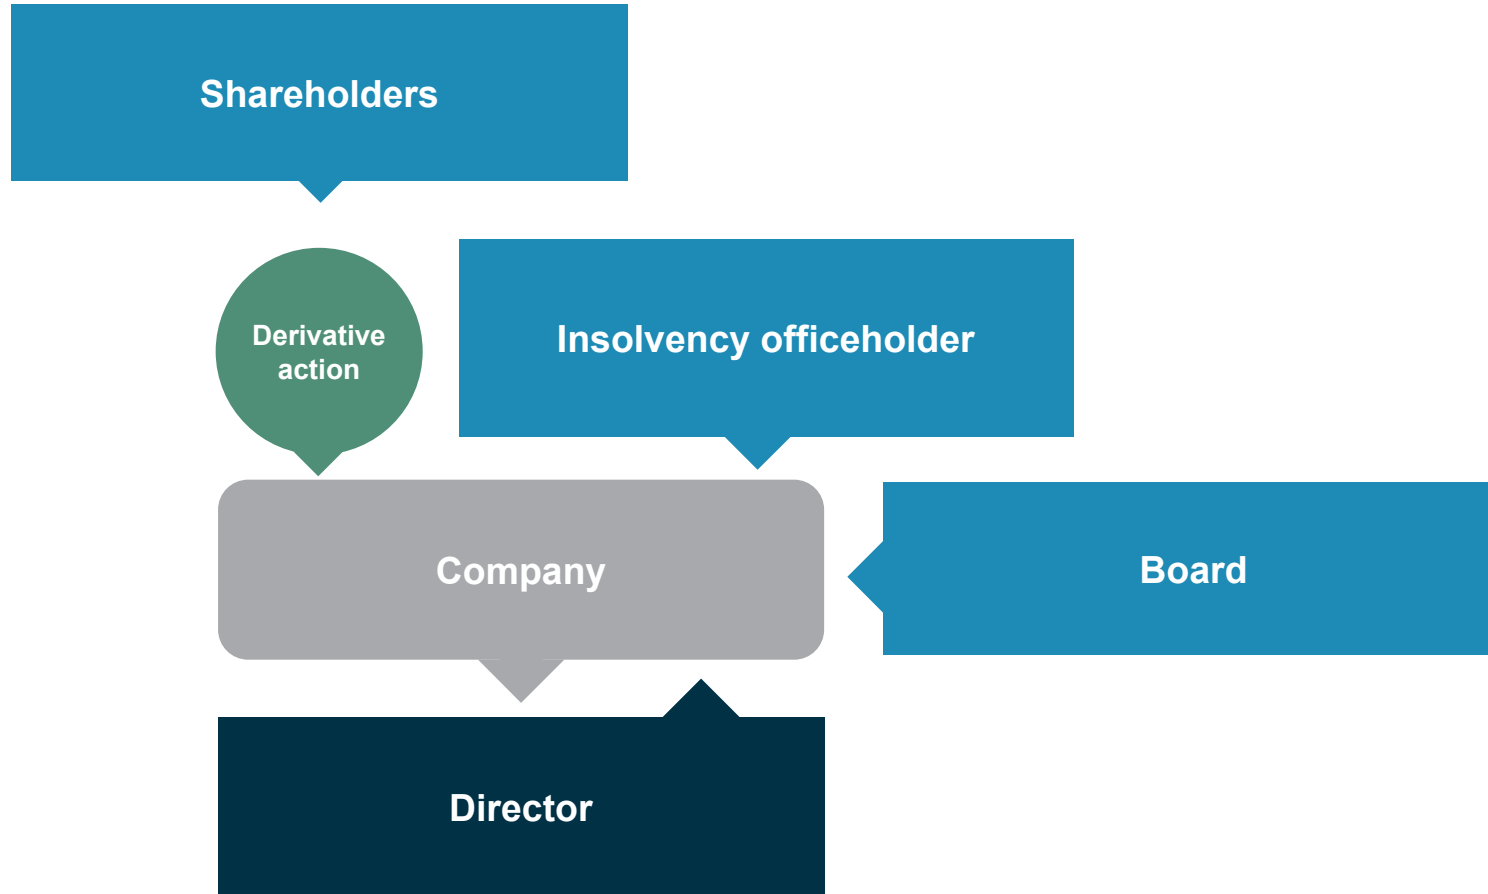

**43%**

Percentage of  
surveyed businesses  
that had a cyber  
breach in the past year  
(UK Government,  
2018)

# Directors' duties

# Enforcing the duties

# Exercising reasonable care skill and diligence

"A director must exercise reasonable care, skill and diligence"

# FTSE 350 Cyber Governance Health Check Report 2017

31%

Percentage of surveyed companies whose board receives "comprehensive and informative" cyber risk information

57%

Percentage of surveyed boards had a clear understanding of the impact of a cyber breach.

68%

Percentage of surveyed boards that had **not** had training on responding to a cyber breach

## The hardening attitude of institutional investors

**“Investors need to discuss these issues at the highest level with board directors to raise awareness and get the board involved. [Cybersecurity] is a key operational and financial risk, not something just left for the IT department to deal with. This issue will only intensify in the future, so investors need to start the conversation with companies today to better understand their exposure.”**

- Legal and General Investment Management (2017)

**"Consistent dialogue on this topic will indicate to companies that cyber security is a priority issue for investors and, as such, should be incorporated into corporate reporting... Through private dialogue, investors may also want to probe the reasons for poor public disclosure and explore how related challenges may be overcome."**

- PRI (2018)

## UK Corporate Governance Code guidance

**The board should establish procedures to manage risk, oversee the internal control framework, and determine the nature and extent of the principal risks the company is willing to take in order to achieve its long-term strategic objectives.**

**The board should carry out a robust assessment of the company's emerging and principal risks. The board should confirm in the annual report that it has completed this assessment, including a description of its principal risks, what procedures are in place to identify emerging risks, and an explanation of how these are being managed or mitigated.**

## Making sure the board gets it right

Exercise effective oversight of cyber security issues

Review and evaluate management approaches to cyber security

Ensure alignment of the cyber security programme to business risk profile

Ensure effective allocation of resources and expertise to cyber issues

Ensure public disclosures are an accurate reflection of cyber risks and incidents

## Sources of help

PRI report "[Stepping up governance on cyber security](#)"  
(2018)  
investors' viewpoint on cybersecurity

[FRC Lab Report on Risk and Viability Reporting \(2017\)](#)  
Examples of best practice in corporate reporting

[FRC Guidance on Risk Management](#) (2014)  
Detailed guidance supporting principles on risk  
management set out in the UK Corporate Governance Code

# Cybersecurity in the supply chain

Jon Round

# The Threat

Various vulnerable points in supply chain

# The Threat

Cyber strength of an organisation that relies on a chain only as strong as the weakest member of the chain

# The threat

Does Oh See have established procedures for managing cyber risks in its supply chain?

Has it followed these procedures?

Records of organisations with which Oh See shares sensitive information?

Does Oh See know:

- whether its suppliers share that data?
- what contractual protections are in place?

# Improve defence

Identify key cyber exposure in your supply chain + carry out DD

# Improve defence

Understand the flow through from suppliers to products / services

# Improve defence

Identify your cyber requirements

Review cyber policies of suppliers

Minimum security policy for suppliers to observe?

# Improve defence

Ensure key protections  
in supply chain  
contracts

# Improve detection

Use contractual rights to regularly audit suppliers' cyber security

Require contractual reporting, with clarity on:

- Notification trigger
- What must be reported
- Contact points
- Timeframes

## Improve response

- ✓ **Draft cyber breach response plan**  
Reflect need for assistance in supply chain contracts
- ✓ **Consider specific cyber insurance**  
For your organisation and its suppliers
- ✓ **Have a record of contractual breach notifications**  
Including which systems / services they relate to

# Cybersecurity and consumer law

## Katie Vickery

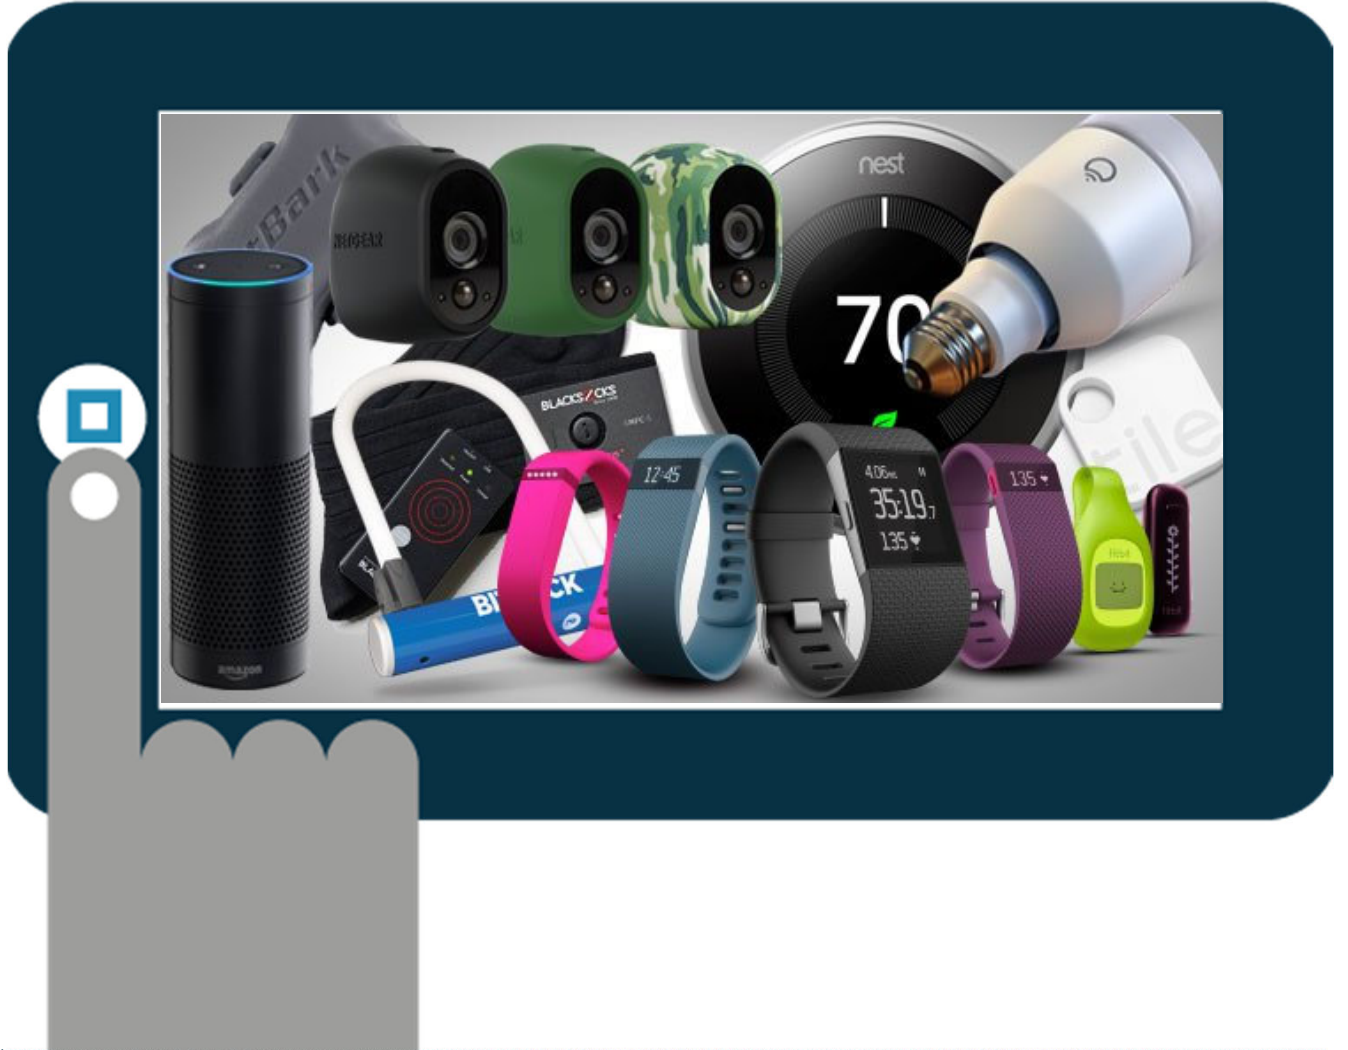

**"....the UK household ownership of smart devices could rise from approximately ten, to fifteen devices per household by 2020"**

# Connected consumer products

# Code of practice

# 13 Guidelines

Device Manufacturer	IOT Service Provider	Mobile Application Developers	Retailers
12 Guidelines apply	11 Guidelines apply	8 Guidelines apply	1 Guideline applies

## Guideline 1

# No default passwords

Passwords are unique and not resettable to any universal factory default.

## Guideline 2

# Implement a vulnerability disclosure policy

Companies that provide internet-connected devices and services shall provide a public point of contact to whom issues can be reported as part of its policy.

## Guideline 3

# Keep software updated

Updates shall be secure, timely and should not impact on the functioning of the device.

Consumers should understand the need for each update and also when updates for the device will stop.

## Guidelines 4-13

4 Securely store credentials and security-sensitive data

5 Communicate securely

6 Minimise exposed attack surfaces

7 Ensure software integrity

8 Ensure that personal data is protected

9 Make systems resilient to outages

10 Monitor system telemetry data

11 Make it easy for consumers to delete personal data

12 Make installation and maintenance of devices easy

13 Validate input data

## The legal implications

Consumer IOT device  
placed "on the market"

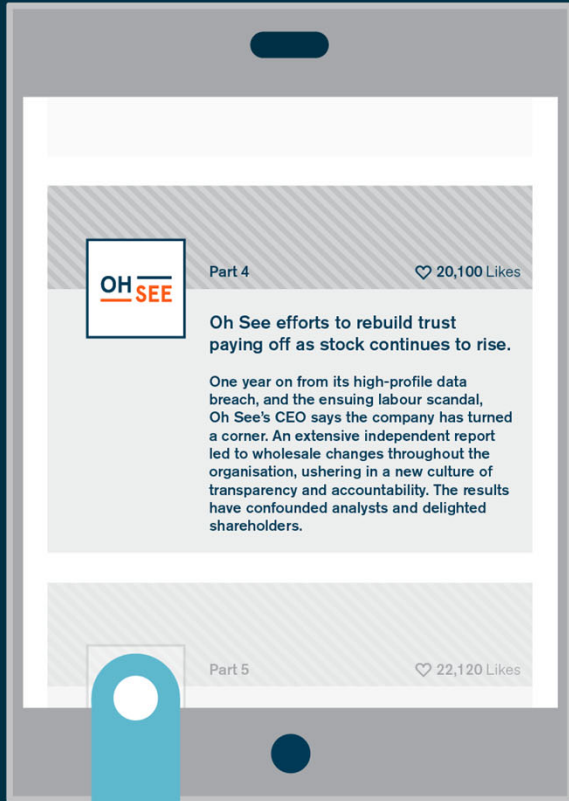

Failure to meet "essential requirements"  
(i) health and safety  
(ii) the protection of property?

Defective product?

Breakout session: option A

# Short-term pain, long-term gain

Tom Ellis, Katie Vickery, Chris Wrigley

## What are we going to cover?

Starting point: following through on Investigation Report Recommendations

Getting Practical: who is responsible and what is happening?

Is technology the answer?

Turning crisis and compliance shortfalls into a positive force

# Following through on Investigation Report Recommendations

## Following through on Investigation Report Recommendations

### Discussion question

**Have you used a particular approach, technique, or strategy, which has helped you ensure your business follows recommendations?**

# Getting Practical: Who is responsible, What is happening And is technology the answer?

# Getting Practical: who is responsible, what is happening and is technology the answer?

## Discussion questions

Do you use specific technology to monitor or actively control compliance systems?

# Turning crisis and compliance shortfalls into a positive force

## Turning crisis and compliance shortfalls into a positive force

### Discussion questions

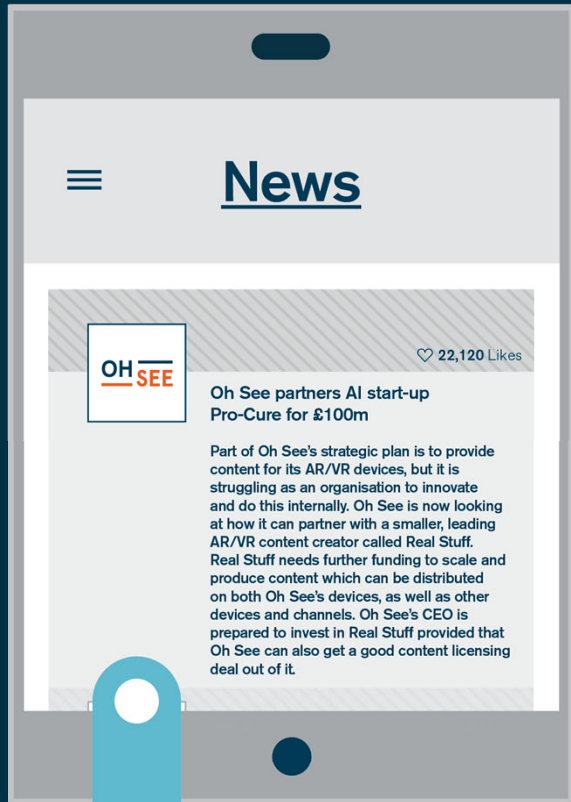

What techniques (large or small) has (or could) your business use to drive its compliance culture?

Breakout session: option B

# Corporate venturing

Mathias Loertscher

# What is corporate venture capital (CVC)?

# CVC corporate structure

# Context for the investment

## Key documents:

- Subscription Agreement
- Shareholders' Agreement
- Articles of Association
- Commercial agreement?

## Other parties:

- Investee company
- Founders/Management
- Angel investors/Friends & Family
- Institutional venture capital funds
- Other CVCs?

## Key terms and legal considerations

Share rights

Board governance

Consent matters

Information rights

Commercial arrangements

Exits

# Subscribing for shares

## Key terms of the Subscription Agreement

Initial  
investment for  
shares

Additional  
investment  
option or  
obligation?

Warranties

# Share rights

CVC class of shares: normally a class of **preferred shares**

Share Right	Preferred Shares
Voting	<ul style="list-style-type: none"><li>• Rank alongside other shares and voting pro rata to number of shares held?</li><li>• Enhanced voting rights for CVCs?</li></ul>
Income (dividends)	<ul style="list-style-type: none"><li>• Rank alongside other shares and dividends paid pro rata to number of shares held?</li><li>• Preferential dividends – fixed dividends (% of investment) or participating dividends ahead of ordinary shares; cumulative if not paid?</li></ul>

# Share rights (cont'd)

Share Right	Preferred Shares
Capital (return of capital or sale)	<ul style="list-style-type: none"><li>• Rank ahead of ordinary shares (and earlier preferred shares?) on return of capital or sale</li><li>• "Participating" or "non-participating":<ul style="list-style-type: none"><li>• <b>Participating</b>: entitled to both amount paid for shares (or a multiple of it) and to participate in the balance of proceeds available pro rata with the ordinary shares;</li><li>• <b>Non-participating</b>: entitled to the <i>higher of</i> amount paid for shares (or a multiple of it) and amount which they would receive if shares were converted into ordinary shares and participated pro rata.</li></ul></li></ul>

# Share rights (cont'd)

Share Right	Preferred Shares
Pre-emption rights	<ul style="list-style-type: none"><li>• Right to participate in future share allotments and share transfers</li><li>• Should investors have priority over other shareholders?</li></ul>
Drag Along	<ul style="list-style-type: none"><li>• Prescribed majority of shareholders to have right to compel other shareholders to sell their shares as part of a sale</li><li>• Does the investor need to be part of dragging majority?</li><li>• If not, in what circumstances can the investor be dragged (and to whom)?</li></ul>
Co-Sale Rights	<ul style="list-style-type: none"><li>• Right to sell a proportionate number of shares if a Founder (or sometimes any other shareholder) sells shares</li></ul>
Tag Along	<ul style="list-style-type: none"><li>• If there is a share transfer which would trigger a change of control, the other shareholders are entitled to sell their shares at the same time and on the same terms</li></ul>

# Board governance

What is the **board composition** and what rights (if any) does the CVC have to appoint a director?

# Consent matters

Certain important company actions may require CVC consent

CVC Specific Issues

Positive Undertakings

# Information rights

**Financial  
information**

**Trading  
updates**

**Exit offers and  
discussions**

# Commercial arrangements

## Timing:

- Co-ordinating signing of the commercial deal with closing the funding round can be challenging

## Condition to completion:

- Desire to complete commercial arrangements will depend on significance/value of commercial arrangement vs financial investment for both sides

## Alternatives:

- If fully negotiated agreement is not possible before signing, consider alternatives (MOU or similar)

## Connection to shareholder rights:

- CVC investor rights may be tied to benefits under commercial arrangement being realised by the company

## Benefit or burden:

- If commercial arrangement is too "extractive" or focuses the company's development too much on the CVC, CVC's investment may be less attractive

# Exits

**Path to  
control**

**ROFR /  
matching  
rights**

**Drag along  
rights**

**Competitors**
