

Smart cities

Our smart cities experts work alongside our clients from across the finance, technology, infrastructure, energy, transport, healthcare and public sectors in thinking about, discussing and preparing for smart cities. They advise on the legal issues that inform the development of smart cities, including in the following areas:

Building smart cities

- BIM/design and build
- Collaboration/ consortia
- Digital infrastructure/ connectivity
- Funding
- Modern methods of construction
- Policy and planning
- Public procurement
- Smart buildings
- Standards and regulations

Powering smart cities

- Decarbonisation
- Energy management
- Power and renewables
- Smart grids
- Storage

Living in smart cities

- Consumer services and digital payment
- Data and privacy
- Future of Living
- Future of Work
- Healthcare
- Physical and digital security
- Sharing economy
- Subscription/as a Service models
- Trust and ethics
- Urban mobility

Operating smart cities

- AI
- Collaboration/ consortia
- Cybersecurity
- Data analytics
- Digital twins
- Interoperability
- IoT
- Tech procurement and integration

Smart cities

About Osborne Clarke

We immerse ourselves in the global issues that are transforming the landscape of how we live, work and do business. Focusing on the transformation drivers that will have the biggest impact on our clients, we use this insight to help you thrive, ensure agility and strengthen the resilience of your business. We are at your side, working closely with you to bring value, share new products and apply digital solutions. **Together we'll be ready for what's next.**

We were commended in the FT Innovative Lawyers Europe 2020 awards.

Decarbonisation

Carbon neutral imperatives are increasingly at the heart of business strategies. This will often require a radical rethink along your entire supply chain, from initial use of carbon all the way through to customer delivery. We will bring our expertise and track record to support you with every step along your decarbonisation journey.

Digitalisation

Businesses are fast being re-shaped to fully exploit the possibilities of digital technology, but timely delivery is vital. Our lawyers are experts in advising on delivering a digitalisation strategy: from procuring digital infrastructure and technology to implementing a data strategy, or responding to a cybersecurity crisis. We support you as you expand or transform your business through technology.

Urban Dynamics

The vast majority of businesses operate in and benefit from the urban environment. The extent to which you understand and engage with urban dynamics will have a significant impact on your continued success. We understand that the way in which cities are designed, built and managed offers extraordinary opportunities. Our legal advice is focused on helping you to realise these opportunities.
