Contacts and About Osborne Clarke

Delivering successful CCUS projects

We have worked in the energy sector for over 20 years, advising clients on evolving legal frameworks that support the energy transition and decarbonisation technologies. Most new, innovative projects, such as CCUS, will require you to navigate evolving regulatory and legal environments. This is something we have extensive experience of, having worked with a wide range of clients on adapting project structures to meet complex, changing Government requirements and underlying commercial investment parameters.

We help investors, developers and other stakeholders deliver CCUS projects: from transport and storage to industrials, gas power, blue hydrogen and the supply chain.

If you would like to talk about how we can help you on CCUS projects, please speak with one of our experts.
